

Yonghao Wu

Master's student at South China Normal University. Research interests include VLA, agentic AI systems, multimodal learning, generative models, and computational imaging.

The HTML CV below is the primary accessible version. The PDF is a secondary printable copy for contexts that require a PDF.

Education

- **South China Normal University**, M.S. in Electromagnetic Field and Microwave Technology, 2023.09-2026.06. Advisor: Prof. Jun Li. GPA: 3.70/5.00, top 5%.
- **Guangdong Ocean University**, B.E. in Electronic Information Engineering, 2019.09-2023.06. Advisor: Prof. Chang Liu. GPA: 3.88/5.00, top 3%.

Thesis Work

- **Master's thesis:** Preliminary Study on Visual Basic Cognitive Theory Based on Attention Imaging Mechanism and the Design of the Corresponding Object-of-Interest Camera.
- **Undergraduate thesis:** Research on Ship Trajectory Data Mining Technology Based on Deep Learning.

Research Areas

Vision-Language-Action

Agentic AI

Multimodal Learning

Generative Models

Optical Imaging

Single-Pixel Imaging

Computer Vision

Selected Research Output

Source-CV reported research outputs are listed separately from ongoing manuscripts. See the publications page for conservative status labels and public-verification notes.

Patent Activity

The source CV lists patent-related records in object-of-interest imaging, bridge collision warning, bridge health-state monitoring, multimodal fusion, trajectory prediction, trajectory clustering, marine data acquisition, smart refrigerator screen systems, and biomimetic robotic fish systems. Specific patent numbers are not shown here until legal status and public-disclosure wording are verified.

imaging systems

bridge safety

trajectory analysis

marine systems

robotic systems

Honors and Awards

Selected honors include National Scholarship, first-class and second-class scholarships, outstanding graduate recognition, model student and outstanding student awards, and Industrial Internet Development Engineer certification.

Representative competition awards include provincial first prizes in electronic design, mathematical modeling, Blue Bridge Cup, Internet+ Innovation and Entrepreneurship Competition, and Challenge Cup.

Skills

- **Programming and research tools:** Python, C++, MySQL, LaTeX, MATLAB.
- **Engineering:** Django development, web crawling, data analysis, mathematical modeling, research plotting, and proposal writing.
- **Agentic AI tools:** LangChain, LangGraph, CrewAI, n8n, and MCP-based workflows.
- **English:** CET-6 500+, IELTS 6.5, English reading, writing, listening, and speaking.

Phone number is intentionally omitted from this public web CV.
